

Miami-FL, March of 2006.

To Whom It May Concern:

Please accept this letter as a character Reference for Mitchell E. Asher.

I understand that he is currently the defendant in a case involving what are commonly know

as " white collar" crimes.

I have know Mr. Asher for 12 years, having met in Vitoria, Espirito Santo (Brazil). At that time,

I was business consultant for granite export sales. I worked directly with, Mr. Asher on

preparing a business plan for foreign "investments in the Brazilian granite industry. As he was

the principal accounting. officer for a US firm doing business inBrazil, we also collaborated on

financial plans for my own start -up business indirect-to-consumer electronics sales.

Mr. Asher business style and acumen were invigorating. He was detail-oriented, dedicated

and hand working. I find him to be a man of his word and genuine with his deed.

When I immigrated to the US in 2001, I again worked with Mr. Asher on getting my corporation Regis tend and established in Florida.

Once again, his knowledge and dedicative yielded a great support for me to commence

business here.

As a single mother with two small chiildren,'l came to know Mr. Asher, his then-wife Liliana,

and their children, David and Sara, on a personal and social level. They became acquainted

with my children too. I have been very impressed with Mitch's level of involvement with his children. .

He is extremely patient and understanding- He mentors them at an adult level and challenges

their gifted abilities- It was refreshing to se a father's embrace and childrearing abilities.

Mitch may have erred, perhaps seriously. But I know that he is a good, capable person who is

extremely conscientious at all of his tasks. He is generous, loving, dutiful and responsible. I

am sure that he regrets his poor actions or judgments, but I am confident that he has learned

from his mistakes.

I hope that he returns to his children and his productive lifestyle soon.

Respectfully Submitted,

Marselha Rocha.

March 8, 2006.

To Whom It May Concern:

I am wiring on behalf of Michel E. Asher, a friend and former employee. Mr.

Asher has

Informed me that he was indicted by a Federal Grand Jury on charges of economic crimes.

has two wonderful children whom he cherishes. He has been active in their development and

involved with synagogue, scouts and Little League.

My confidence is extremely high that Mitch will become, once again, a productive and useful

member ofthe community. I find him to be a man of his word and I have never felt betrayed. I also

deeply believe that his divorce, investment failures and declining health have contributed to his

misdeeds. Once paying his price, hopefully short, I am confident that he will right his wrong to the best of his ability.

I welcome the day when Mitch and I can work together again and build another successful

enterprise. He is a person to be held in the highest regard and I pray that the court comprehends

similarly. Should my personal appearance in Mitch's case be requested, I am able and willing to be

in Anchorage on short notice.

Mitch has helped me in my successes, now I would like to stand by him and return the favor.

Bogota, Colombia March 30th, 2006

To the United States District Court for Alaska:

My name is Graciela Duque, the executive administrator of Clinic Kirpalamar. We are a

private retreat in the suburbs of Bogota that offers alternative medical solutions to the

chronically ill. The Clinic and its medicine were founded by my husband, Dr German

Duque, a noted and published physician worldwide -

At the request of Mr. Mitchell Asher, I am authoring a personal reference on his behalf. I

first was introduced to Mr. Asher in 1993 by a former patient and subsequent trustee. Mr.

Asher suffered from episodes of supra ventricular tachycardia, atrial

fibrillation, edema,

hypertension and obesity. Over regular visits to our clinic, we assessed and treated Mr.

Asher's disorders with natural solutions, commonly referred to as homeopathy. In addition, a strict diet and cleansing regimen was implemented. Over the course of

approximately five years, Mr. Asher's conditions generally improved, but not without

setback. While in residence at the clinic, his progress was exemplary; but once in his

normal routine, his symptoms worsened.

When I last saw Mr. Asher in 2004 he was overwhelmed by his doctor's diagnosis of CHF

(Congestive Heart Failure). This was shortly after he relocated to Alaska with the

intentions of "making a fresh start".

We met during his visit to Florida, where I was attending a conference. I urged him to

make drastic changes in his lifestyle, especially with his diet and nutrition.

He told me

about his research in having a Roux-N-Y Gastric Bypass performed. Although an extreme

measure, I understood his desire.

We spoke again in mid - 2005. Sr. Asher informed me about his multiple surgeries including a Cardiac Ablation, Vascular Repair and a Gastric Bypass. He was

hopeful to

improve his health and become involved in a fitness program. I was pleased to hear of his

drop in weight and rise in spirits.

I was somewhat shocked to hear about Mr. Ashes current legal, problems. But at the

same time, I understood that he didn't have adequate insurance coverage for his procedures and he worried about his children's financial security. For Mr. Asher to have committed these crimes is the sign of a desperate man. His resorting to desperate measures indicates his interpretation that all of his options were exhausted. I am aware that now in addition to Mr. Ashe's regret, he is conscious that he has a significant support system of friends and family, clergy and business associates, that will direct him on the correct path.

He is a worthy individual and I am grateful for knowing him. I am honored to write this letter on his behalf and to vouch for his character and his abilities. I am certain that after this process is concluded, Mr Asher will undoubtedly remain inside the law. Thank you for any consideration afforded to Mr. Asher at this extremely serious juncture in his life.

He is worth it.

; ,Cordially.,

January 26, 2006

Dear Sir:

It is with great pleasure that I submit this letter on behalf of Mitchell E.

Asher. I have .known him

as a dedicated father attempting to juggle baseball and cub scouts for his son David.

Mitchell has always displayed a high degree of integrity, responsibility, and caring. He is

definitely an asset to Goldenrod Little League and to this community. In addition to his excellent

accomplishments, he has proven his community service by organizing and working our

concession stand at the Goldenrod Little League fields to provide the parents and players an

opportunity to have refreshments and food during games. This effort helped Goldenrod obtain the

funds needed to provide this baseball service to the children

. of our community.

He is also a most dependable team player. His good judgment and mature outlook ensured a

logical and practical approach to the success of the league in no small way.

Mitchell would be an asset to any community, and I am happy to give him my wholehearted support.

Edwin Aviles

President Goldenrod Little League

Goldenrod Little League's mission is to implant firmly into the children of the community the ideals of good

sportsmanship, honesty, loyalty, courage and respect for authority, so that they may be well-adjusted, stronger and happier children and will grow to be good, decent, healthy, and trustworthy citizens.

To Whom It May Concern

Dear Sir or Madam:

I am an attorney located in Palo Alto California. We represent primarily Fortune 500 companies in

. credit and insolvency issues throughout the world. I worked with Mitch for a multi-year period as counsel for a corporation of which he was an executive. He was an extremely competent negotiator and business representative. He had positive personal skills and an ability to influence people.

Mitch and I traveled to South Korea on one occasion in order to negotiate a solution to a significant business issue. His negotiations with the business representation on the other side solved the problem and allowed a settlement to be consummated.

I believe that, upon his release, he will reenter the work force and provide a positive contribution.

PALO ALTO, CALIFORNIA 94306

Re: Mitchell Ellis Asher

Monday, February 20, 2006

To whom it may concern:

I've known Mitch Asher all my life. He is one month older than me, and our parents were friends with each other before we were born in, respectively, July and August of 1956. That was in Brooklyn, New York.

We were in school together through junior high. After that, we attended different

high schools and colleges. He relocated to the West Coast, and I stayed east. Over the years, we've remained in close touch, especially since the advent of cell

phones and e-mail. The past few years, we've e-mailed or talked on average, three to four times a week.

I'm in the dark as to the dealings that led to his current legal mess. But in terms of

character reference, he's been both a top-shelf best friend to me, and an excellent

father to his two kids, as far as I can see.

I know Mitch's son, David, much better than his daughter (who I've only met once or twice, when she was a baby). Mitch and David have a healthy, normal relationship ... Boy Scouts, little league, skiing trips up north, and that sort or

thing. I should be that nurturing a father myself!

I've also been asked to comment on Mitch's extensive international travel.

When he lived in California, Mitch traveled several times (maybe more) to the Far

East as a Seiko executive.

(more)

Re: Mitchell Ellis Asher (2-2-2-2)

More recently, while an executive with a company called Vitech (later, Bahiatech) in

Miami, Mitch traveled extensively - up to twice or three times monthly - between Miami and South America, mainly Brazil, where Vitech/Bahiatech maintained all of its manufacturing and most of its personnel. I accompanied Mitch on one such business trip in 1995.

We went to dinner with his boss, to some clubs, on a trip to a beach resort (with

girls, we're straight!) ... but it was mainly inspecting the offices and manufacturing facility, and lots of meetings.

He's also traveled several times to Colombia, and at least once to Mexico, in search of solutions to his many medical woes. I accompanied him to Monterrey, Mexico last year, where he later had gastric bypass surgery done.

As to his trips to Colombia, he visited an holistic health clinic on several occasions,

and, of course, Colombia is the native land of Mitch's ex-wife and mother of his children ... Martha Liliana Ospina Asher, I believe' is her full name.

As I mentioned earlier in this note, I know nothing, essentially, about Mitch's current

legal problems and what exactly he did to land him in jail. As to how someone as close to him as I am can honestly say that, my guess is that he never brought me "into the loop" of these affairs so I could later (Le.-now) swear utter ignorance.

In a somewhat twisted sense, I suppose that was done out of extreme friendship on his part.

In conclusion ... it sounds like Mitch did some bad things and is justly incarcerated. I do ask that he be given whatever leniency you will allow. He's non-violent, a good father and a good friend.

If you need any further information, feel free to mail, e-mail or phone me anytime, at the numbers and addresses at the top of page one of this letter.

March 22, 2006

To Whom It May Concern:

I recently found out that Mitch Asher was arrested for embezzlement in the state of Alaska: I

decided to write this letter to the court expressing my experience in working with Mitch and

my experience with him as a friend.

I first met Mitch in Miami back in 1992 as we work together at U.S. Computer.

Mitch was hired

as the CFO and I held the position of Purchasing Manager. This was Mitch's first job with a

computer company. I worked very close to Mitch as the company was buying large quantities

of computer parts from major manufactures and it was fruitful to work with him as he was in

charge of paying the vendors and keeping the company financially healthy. As it turned out I

found working with Mitch was very successful as he was willing to learn and deal with the

manufactures in a professional manor. Together we were able in improve our relationship with

three key manufactures that helped our company by increasing our credit terms and credit

limits.

As we continued to work together at U. S. Computer we started to .socialize together outside of

work. We became friends quickly as I found Mitch to be a good friend. Around this time Mitch

and I were out at a local restaurant where he met his future wife. He later married her and she

became pregnant with his son David.

After U.S. Computer Mitch took on a job with a company I recommended him to.

Again his

position was CFO. I later was hired by Mitch as the Purchasing Manager. Together we

expanded the companies credit terms and limits to over 2 million dollars. This company later

went public and Mitch was rewarded for his efforts in building the. company and managing the

Miami operations.

Next work experience was with a company that Mitch owned, CPI. Again I was hired to do the

purchasing. The company was small but we did open operations in two cities in Brazil. We

exported computer parts to our offices in Brazil where we resold them.

This was the last work experience I had with Mitch and we each went our own ways. It was my

observation that was very talented at his job functions. He worked very hard and was there early

every morning and the last one to leave every night. He has shown good work ethics and is

determined to get the job done.

Mitch is a loving father to his son David. Anyone who has seen them together would clearly see

this. He also can be a very good friend as I have personally experienced. I'm surprised at the turn

of events that Mitch finds himself in. I have seen the opposite in his behavior. I hope that the

court considers all his good points and looks to help him instead of just punishment. He is a

person that has proven to be a valuable citizen and should be given a chance to give back to the community and his family.

Sincerely, V

Glenn Real-Mi

1401 SW Cellini Avenue

Stuart, FL 34953

February 27, 2006

To Whom It May Concern:

I met Mitch Asher in 1994 when I applied for a receptionist position at Vltech America

in Miami, Florida. I worked with Mitch for approximately 5 years. While- I was at

Vitech, he was in charge of the office because the owner lived in Brazil. He was trusted with all the daily activities that were needed to run and promote the business.

He handled everything from hiring personnel to making sure product was ordered and delivered to the daily cash flow management. He was even instrumental in helping the company go public and being traded on the stock market.

It has been my pleasure to be one of his coworkers at Vltech as well as at Commodity Plus in 1999 and Kent Security in 2001. He has shown time and time again his dedication to his employer and their business. He seemed to always be the

first one at work and the last one to leave. He took his responsibilities seriously and

instilled that in other employees as well.

When I first started working with Mitch I had little or no knowledge of computers. With

his help I was able to acquire the computer capabilities I needed in today's work force

to elevate my position to office manager. He taught me a lot about accounting practices so I could combine my office manager skills with that of book keeping.

He

was a great teacher and became a good friend. If the opportunity arose, it would be

my pleasure to work with him again. .

I was working with Mitch when he first became a father. The way he bonded with his

son David was amazing. He doted on his son. The only time I ever saw him leave work earlier than anyone else was to pick up his son from daycare. Later it was my

pleasure to once again see him with his baby girl, Sara. He was always planning his

weekends to be with his family so he would have the quality time he so desired with

them. He would bring pictures in to work on Monday of things they had done. His family has always come first in his life. I have never seen a more devoted father.

When his marriage to Lilliana ended, he did everything in his power to maintain his

relationships with his son and daughter. He had David live with him and he had Sara

. during holidays and on weekends whenever it could be arranged.

His devotion to family did not end with his son and daughter. He also helped his elderly parents. I remember his dad was retired but still wanted to work so he would

sell things at the local flea market. Mitch would try and make sure he was not

overdoing it especially with the hot weather in Miami. He also helped his sister, Pagelof2 . Donna with her flea market business and other matters. When her son Dustin wanted to move to Miami, Mitch opened up his home and helped him find work. Mitch has also helped me during some of the hardest times in my life. He was there . to help me get to California to say my good byes, when my mom and dad passed away only months apart. He showed a lot of patience and compassion when he had to deal with the very emotional person I became during that time. When my daughter Jessica needed work but was having difficulty finding a job, he stepped forward and offered her one until she could find a more suitable position. He even allowed her to bring her baby to work with her because she could not put her in daycare. I have seen him help other friends and coworkers with problems. Whether they needed financial help or just a good listener, he made himself available. I now hope this letter will help him the way he has helped me and others. The information contained in this letter is true and correct to the best of my ability.

Sincerely,
Linda G. Odom

To Whom It May Concern:

This letter is to verify that Mitchell Asher, along with his son David, belonged to our congregation in 2003 and was a member in good standing. He regularly attended our Shabbat and High Holiday services and his son also attended religious school. If you are in need of any other information, feel free to contact me through the synagogue office.

Board Member and Secretary

Martha Asher

7608 NW18th Street

Margate, Florida 33063

To Whom It May Concern:

I am Martha Asher, Mitchell Asher's mother. My husband, Herman Asher (Mitch's father) is

going on 90 years old and I am 86 years old. We will celebrate our 65th wedding anniversary

this September, god willing.

I'm sure you receive many letters from moms and dads written on behalf of their sons and

daughters. This is the hardest letter I've ever written. I never thought I would be in this

position, but would like you to know part of the son I know.

Over the last fifteen years or so as we have gotten much older, our son has been there for us.

After retiring and still trying to work part-time, we still could not fully live comfortably.

Mitchell took over and for probably the last four cars that we have had, Mitch has made the

car payments every months for many years. For the last few years especially, Mitchell has

called us almost daily. He was always on top of our paperwork, insurance, dealing with the

many doctors and going shopping for us. He is what you expect from a son. He could always

rely on him ..

In last October, our condo had so much damage ... no windows, flooding, no electricity, from

the hurricane, Mitchell immediately drove to our home and took us to live with him and our

grandson. He made proper arrangements for repair work and in his hometown of Orlando, he

made arrangements for us to see local doctors and the hospital.

Mitchell is devoted to his children. He sent the to Hebrew school, celebrates the Sabbath

weekly, joined a temple, became involved in cubscouts and became a leader and was very

active at the school. He took them on educational trips and also camping. He read with them

every night before they went to sleep.

My husband and I were stunned by the news surrounding Mitchell. My husband and I talk

over and over about what we believe could have led to this. After his divorce he gained a lot

of weight and was up to 325 pounds at one point. Obviously, his health was terrible, and

some of his business ideas failed ... and we believe all of this led to where he is now.

He is a very loving, giving lind caring son. He is a great asset to us, to his children and to his

community. We only hope that you return him to us shortly for we are waiting patiently for

his return. He can live with us and see his children, as they live nearby. As he has been there

for us, we will be there for him.

Thanking you in advance for your consideration, I am

Sincerely,
Martha Asher
May, 2006

Dona Quinones
312 Lama Avenue
Long Beach, California 90814
May 19, 2006

Dear Judge Beistline:

I am Mitchell Asher's sister and am writing on behalf of him. I am his older sister, but most of the time, he was older and wiser than me. We are very close and until his arrest, we spoke to each other almost daily. I counted on him for advise for my business, on my children and grandchildren, on our parents and he is a great listener. You couldn't ask for a better brother. When my children were young, and I was going through a divorce, he was the one I counted on. He rolled up his sleeves and jumped right in! He took the kids to museums, theater and plays, to the park, to the beach, and especially to the library. He is very nurturing and loving. When my son was in college; he started fooling around and not appreciating what he had been given. My brother recommended that he leave and come to work for him in Brazil. It was very hard work and very little pay and very little free time. He stayed there for two years, fumed his life around and Mitch was there guiding him through it all. My son was floundering and Mitch put him on an even keel. My son became a man. Whenever Mitch traveled for business, he would send literature, catalogs and photos from Brazil. Japan, Columbia and make adventures and games for the kids. He was a very involved Uncle and took the role very seriously. I've been in business for twenty years and could not have done it without him. There were many ups and downs and a lot of learning experiences and he always came through with a game plan .. sometimes plan A. plan B and even C. My brother has always been my parent's keepers. They rely on him and are quite lost without him. He helps them in many ways and always keeps their morale positive. He brings the children to them and he prepares food for everyone. He makes them laugh. And he listens over and over again as my father talks about his involvement during World War II. He brings them CD's and videos of old movies and big band music. He gets my dad to do jumble word puzzles and gets my mom to watch jeopardy, all of which help with their memory. As he was with my children, Mitch is a great dad. He does everything a person can do. Since they were very young, he reads with them, does puzzles and brain teasers and is completely involved with their education.' He has made sure that they are well rounded. They attend temple

activities, cubscouts. brownies, Hebrew school. reading clubs, library functions and community fundraisers, dance and little league. One example of how dedicated he is: they read together everyday. When my brother travels they still read together every night. He buys or checks out

When my brother got divorced he started putting on weight and continued until wilenlast saw him,
he was over 300 pounds. His health was terrible. I went with him several times to see the cardiologist who said he was in danger. I saw it, He had trouble breathing and could hardly walk. If started fa affect his play with his son. He couldn't move well. I believe this was a motivating tactor for what he did.

My brother is overwhelmed with remorse for what he has done. I only hope his imprisonment will not be long. He is needed by his children, his parents and me. When he is released I have ample work for him to be gainfully employed. He has a terrific support group around him and he is loved and respected. I pray that you will be sensitive and fair in your evaluation of the situation. He is a wonderful human being and we will all help Mitch as he has helped us.

Respectfully,

'~~~\j~~

DR. PABLO G. ZORHILLA BLANCO, F.kCS.
CIRUGIA DIGESTIV A,tIRUGIA DE LA OBESIDAD
CIRUGIA GENERAL
Monterrey, N. L., Mexico. May 15, 2006
To Whom Concern:

.
,
This is to inform you that the patient Mr. Mitchell Asher had a Gastric Bypass Surgery on June 14, 2005 in Clinica Vitro from Monterrey, Mexico. The reason for the intervention was that he suffers from Morbid Obesity. i
He was a 48 year old man, his weight was! 295 pounds and his Body Mass Index (H.M.I.) was 46 Kg x m2, and he therefore was a candidate for serious health problems in the years to come, unless he underwent obesity surgery.
It was a medical necessity to do this kind of surgery to Mr. Asher to improve his medical condition and to prevent serious medical complications in the future.

i
Sincerely
~~~  
a ~a,M.D, FAc.S.

Previa Asepsia del abdomen y la colocacion de los campos esteriles se practico incision media supraumbilical, naciendo hemostasia con electro cauterio y entrando por planos a la cavidad abdominal, se colocaron los retractores y se procedio a realizar una bolsa gastrica vertical en la curvatura menor de estomago de 15 cc de capacidad, utilizando una engrapadora lineal cortante T1.C 75, se invaginaron las !lineas de grapas del estomago excluido y de la bolsa gastrica con prolene 3-0, se realizo una ~rueba de hermeticidad con azul de metileno y se coloco una banda de 'Marlex de 5.5 cm de longitud en la bolsa gastrica 2 cm por arriba de su borde inferior, fijandola con clips hacia la cara anterior. .Posteriormente se secciono el yeyuno proximal y su mesenterio a "3"0 cm por abajo del ligamento de Treitz con engrapadora lineal cortante TLC 75 invaginando las !lineas de grapas de ambos extremos con prolene 3\_0 y pasando el extremo distal en Iomaretrocolica y retrogastrica hasta interponerlo entre el estomago excluido y la bolsa gastrica fijandolo a esta ultima con seda 3-0. En seguida se realizo una gastroenterostomia termino-lateral en forma manual en dos capas con vicryl y prolene 3-0 y a 100 cm de esta an~stomosis se I realizo una yeyuno-yeyunostomia latero-lateral en forma manual en dos capas con vicryl y prolene 3-"0.Se suturaron los defectos del mesocolon transversal y del mesenterio con seda 3-0 , se realizo una prueba de hermeticidad con azul de metileno, se irriego con solucion salina y se coloco un drenaje tipo Jackson Pratt a un lado de la 'bolsa gastrica sacandolo por contra-abertura. Se realizo una gastrostomia del estomago excluido con una sonda de Foley No. 2'2 Fr condoble jareta de corno z-0 ~ seda 3--ofijando el estomago ala pared abdominal y marcando el sitio con un anillo de silastic.

Se cerro la pared abdominal en un solo plano c4n Ethibond No 2, TCS con Vicryl 3-0 dejando un drenovac de V, y la piel con monocryl J-u.

WRITTEN-CONSENT CERTIFICATE FOR OPEN OR  
LAPAROSCOPIC "Roux en Y" GASTRIC BYPASS

!

I

I

You have decided to be exposed to Gastric Bypass Surgery (Roux en Y), using a  
Roux-Y gastrojejunostomy. This procedure involves creating a new connection between the stomach and the small intestine.

7

and risks of this operation.

Contact with food.

eds i 'II ha ied.out i . . al ' Any

I

During the previous weeks you have received complete and detailed information about the procedure and other options for your weight control. You have also learned about the benefits.

The purpose of this written consent is to confirm your decision to have this operation, based on complete knowledge and understanding of the procedure. Please read the next written consent carefully.

If in any way you do not agree or have doubts, ask your doctor before signing.

The purpose of the Gastric Bypass Surgery is to help you to control your weight by reducing the capability to eat and by diminishing the desire for food. Your stomach will be reduced in its capacity and food will pass directly to the second part of the small intestine, the jejunum. The rest of your stomach, which is the first part of the small intestine called "duodenum". This

will cause you to feel "full" after eating a small amount of food producing a satiated sensation.

These changes will help you to control your weight.

The operation consists of:

Stapling and dividing the stomach into two separate parts: The first part is called the

gastric pouch. This pouch is small and has a capacity of less than one ounce. This pouch is where the food will first arrive. The other part of the stomach is considered the "excluded stomach" and has no

Band placement: The band will be placed in the end of the small pouch controlling the passage of food into the intestine.

Connection between the gastric pouch and small bowel: The small bowel will be sectioned 25-

to 30cm below the duodenum and it will be reconnected in a "Y" fashion through itself and the gastric

pouch. This provides a way out for food and duodenal secretions,

Other possible surgeries: Your abdomen will be completely explored during the procedure: No

other procedure will be performed unless, certain conditions are found. (gallbladder stones, ovarian cyst, intestinal diverticula, etc.)

, I th

surgic : Interventional Oncology. In a patient at this time we have enormous benefits,

but is. necess-ary to know the risk assooiated ~th the procedure. The complications include anesthetic and surgical risks, which are more 6ften in the obese patients. Certain conditions such as hypertension, diabetes, heart problems and previous abdomirial surgery increase the risks. EDIFiCO MEDICO DE ESPECfALISTAS AVE. H1DALGONo. 2532 DESP. 311 MONT.ERREY N.L. MEXmu. '"" ""l" on."

", "' . "':.. -  
.

Keep ~ mind. that it could be ~ecessary to ~ccaSiOll~IY ?~ the abdomen to .comp~ete the. operation. This could happen m the case of poor visualization or any event Impeding the present technique. In these cases your doctor WILL decide to do so, based on his judgment, Therefore, . you must ~ee t? ac~pt the: surgical t~m's decisions. The risJ's of. this operation include bleeding, infection, l~ge (gastric pouch, stomach or intestine), intestinal obstruction, spleen lesions requiring its removal, lung problems such as collapse or clots that will need respiratory assistaht. There are some problems that may occur months or years. aftersurgery such as malnutrition, adhesions and stomach ulcers. Persistent vomiting is generally due to bad eating iJbits, although sometimes could be caused by obstruction of the gastric outlet. . The use of multivitamin and mineral preparation is mandatory for long periods of time to . .' I a~ nutriti~nal deficiencies, . .:

Weght loss IS usually over 50"/0, while most of the pattents, lose between 75% and 100"/0 of excess weight, however, there are some patients that lose less than that and regain weight, because of have bad eating habits. This-operation is reversible although this process has not been requested from us. The result~ and otIterstudies will be filed and could be used for statistical or scientific purposes.
